SENTRI

## Monitor & stay in control anytime anywhere

Monitor

Sentri comes with a full suite of environmental sensors, a motion detector, and an HD camera. Check in with your Sentri app and receive real-time alerts.

Control

Connect to all your home's smart devices, now and in the future. Use Sentri as a hub to view, stay in control, and make the most of all your devices from one application.

Learn

Over time, Sentri learns the alerts you care about most, delivering information personalized just for you.

- Light Sensor
- Temperature
- Air Quality
- Humidity
- Microphone
- Speaker

Software

- Live video and sound feed
- Mobile notification and alerts
- Remote for other smart devices
- Geofencing
- Customizable privacy settings

- Free download of iOS and Android app
- Dashboard and trends display
- Instagram integrations for your Sentri display
- Customizable clock-face and designer theme backgrounds

SENTRI
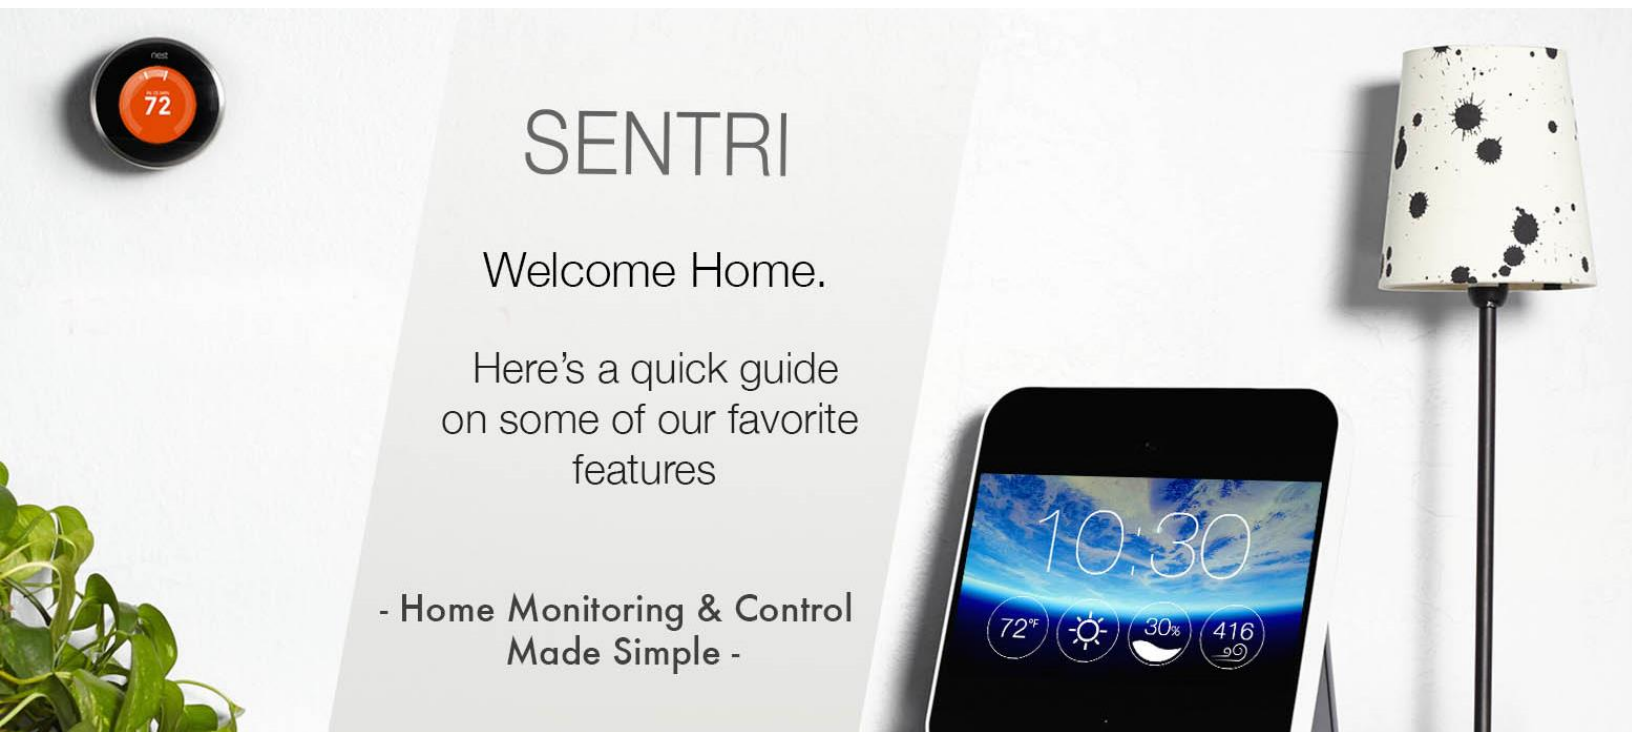

// FIVE THINGS NOT TO MISS ON YOUR SENTRI

Sentri was built on a core philosophy of simple yet powerful. Here are **five key things** you'll want to be sure to check out:

- **Check In When You're Away**. Start a 'live' video stream from your phone -- now you'll always know what the household pup is up to when you're away (and how many treats he sneaks in when you're not lookin').

- **Lights On, Lights Off**. Turn on that Philip Hue light, adjust your Nest thermostat, and switch off your WeMo switches – all from your Sentri app

- **Catch the Thief!** Put Sentri on 'away' mode and have someone walk in front of it -- check out the snapshot and recorded video clip afterwards!

- **Your Day, In Review**. Review your day's events on our timeline straight from the Sentri device -- only fingertips required

- **Express Yourself**. Change up the background of your Sentri -- sunset? sunrise? seas or mountains? We've got you covered.

SENTRI

And of course -- set it up … but those 10 seconds sure flew by quickly didn't they?

Finally, don't forget to get ready for '**WHAT'S COMING NEXT**'. We're just getting started!

Want more info? Find some step-by-step details on all power that comes packed inside your Sentri below …

// GETTING STARTED

1. **Set Sentri up.** Plug in, connect to your home's Ethernet or WiFi*, and you're done.

   Find a favorite corner/wall of your home (or office) and let Sentri get to work for you.

2. **Play with the touchscreen.** Swipe left to see all the ways you can customize Sentri, including:

   - Changing the mode from 'away' to 'home' (Away = alerts on, Home = alerts off)
   - Change the Sentri name, temperature reading (Celsius versus Fahrenheit) (found under 'General' settings – second tab on the settings screen)
   - Change the Sentri background (found under 'Theme' – third tab on the settings screen)
   - Swipe right to get a quick view of the your events and alerts
   - Tap on an image to get an expanded view of the captured snapshot

*Sentri supports 2.4 Ghz WiFi

SENTRI

<u>On the main screen</u>

Tap on the weather icon (second icon from the left) to get a look at the weather for the week. Will you need an umbrella, a scarf, or some shades? Sentri provides all the information you need on your home and outside environment from your fingertips.

On Day 2, come back to the main screen and get a full read on how your home's temperature, humidity, and air quality changes over the course of a day.

3. **Download the mobile app**. Available for iOS and Android.

Experience the power of Sentri on the go by:
- Starting a live video stream
- Tapping into your 'Alerts' to get a feed of all the key events in your home
- Getting a reading of your home's health, no matter where you are
- Setting Sentri's mode between 'home' and 'away'

Found an alert that wasn't really an alert (e.g., your dog walking by)? Mark it as a 'false alarm' so that Sentri can help deliver the alerts that matter most to you.

// CONNECTING OTHER DEVICES

Go to the 'Devices' section of the mobile app and click 'add new device' to get started!

If you have a WeMo or Philip Hue, make sure your phone is connected to the same network (e.g., WiFi) and do a quick scan – you'll see the devices detected on your network pop up. Follow the on-screen directions and you're done!

If you have a Nest Thermostat, simply log-in to your Nest account.

Sentri currently supports Nest Thermostat, Philip Hue Smart Light, and Belkin WeMo Smart Switch and Insight Switch.

SENTRI

// SENTRI INSIDER TIPS

Here are some fun ways you can make Sentri even more you.

- Change your Sentri name using your mobile app (found under 'settings') and add some emoticons to your Sentri
- Take screenshots of the snapshots captured on your Sentri to save them to your phone

// WHAT'S COMING NEXT

Part of the beauty of Sentri is its ability to not only learn the alerts that matter most to you, but to improve over time. Be on the lookout for a major update coming your way this November which may include features such as:

- Device control straight from the Sentri screen
- Video playback directly from Sentri
- Siren trigger enabled on Sentri
- … and more

SENTRI

All-in-One Home Monitoring Made Simple

Welcome to Sentri – we can't wait to share what we've built with you. The promise that we built Sentri around is a simple one – safer and smarter homes for all, and we're excited to share our flagship product, an all-in-one home monitoring solution, with you. We can't wait to hear how you use your Sentri, and wanted to highlight **five key things** you'll want to be sure to check out:

- **Check In When You're Away.** Start a live video stream from your phone – now you can always see your home in crisp, HD quality to see what the household pup is up to when you're away (and how many treats he sneaks in when you're not lookin')

- **Catch the Thief!** Put Sentri on 'away' mode (either from your mobile app or Sentri itself) and have someone walk in front of it – check out the snapshot and recorded video clip afterwards!

- **Your Day, In Review.** Review your day's events on the Sentri timeline straight from your Sentri itself – only fingertips required

- **Express Yourself.** Change up Sentri's look and feel – sunset? Sunrise? Seas or moons? We've got you covered with customizable backgrounds.

- **Give Your Home a Checkup.** Environmental health is just as important as physical security. Check in on your home's health using the trends Sentri highlights on either your Sentri device or mobile app. Be sure to check out both the day and week views, and see how your home's temperature, humidity, and air quality change over time!

Wait, there's more! Sentri will feature frequent over-the-air updates (happens automatically without you having to do a thing) always ensuring this smart home product is constantly improving and always getting smarter.

With thanks,
Team Sentri

On the main screen

SENTRI

Tap on the weather icon (second icon from the left) to get a look at the weather for the week. Will you need an umbrella, a scarf, or some shades? Sentri provides all the information you need on your home and outside environment from your fingertips.

On Day 2, come back to the main screen and get a full read on how your home's temperature, humidity, and air quality changes over the course of a day.

Get a read on the Sentri status
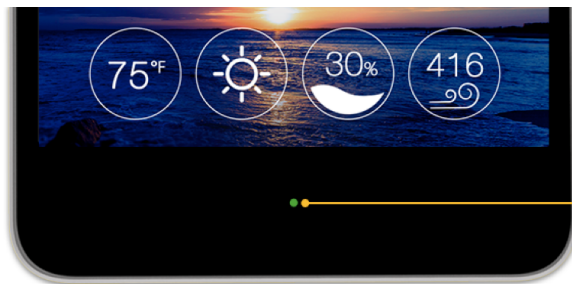

- **Green light:** All systems a go! Everything is normal.
- **Flashing green light:** Unread notifications/alerts; swipe right to access timeline.
- **Blue light:** Video is being recorded or streamed.
- **Red light:** Sentri is unplugged and running on battery.
- **Flashing redlight:** Sentri is running low on battery and needs to be plugged in.

We've included a small LED light on the bottom of your Sentri so you always know what the status of your Sentri is (including if someone is livestreaming into your camera right now!)

- Green light -- All systems a go! Everything is normal.
- Flashing green light -- Unread notifications/alerts -- swipe right to access your event timeline
- Blue -- Video is being recorded or streamed
- Red -- Sentri is unplugged and running on battery
- Flashing red -- Sentri has less than 20% of battery left and needs to be plugged in

Download the mobile app

 Available for iOS and Android

Experience the power of Sentri on the go by:

- Starting a live video stream by clicking on "Watch Live"
- Tapping into your 'Alerts' to get a feed of all the key events in your home
- Getting a reading of your home's environmental health, no matter where you are
- Setting Sentri's mode between 'home' and 'away'

SENTRI
